

## Sandwich Maker Big Double

**Rs. 22200(GST Extra)**

Utilizes subdivisions allowing pairs of bread slices to be clamped together around fillings to form pockets or stuffed sandwiches. A combination of heat and pressure seals the bread at the outer edges. Once the device is hot, the sandwich can be assembled 'inside out' where the buttered side of the bread faces outwards against the metal plates and the filling sits inside. These grills are electronically heated and can be set to various purposes based on the sandwich.
